Overall Length:

23.500 inches

Overall Height:

14.500 inches

Overall Width:

18.000 inches

Voltage In Volts And Current Type:

115.0 ac

Special Features:

To name: absorption dynamometer; provides opposing loads for measuring the output torque of power units and rotary actuators;
0-200in/lb load range in 4 ranges; 2000 rpm speed

Reference Data And Literature:

To 33d3-8-23-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
