Overall Length:

18.000 inches

Overall Height:

6.000 inches

Overall Width:

10.500 inches

Case Material:

Aluminum

Accessory Components And Quantity:

Thermometer 1; test lead, thermocouple 1; test lead, resistance thermometer 1; test leads, adapter 5

Scale Calibration:

Calibrated to 12 and 24 v resistance thermometers; calibrated to iron constantan, chromel and alumel thermocouples

Installation Design:

Portable

Scale Range:

22.50 to 28.50 v; 11.25 to 14.25 v

Scale Type:

Eccentric

Measurement Type:

Potentiometer circuit and millivolt circuit

Scale Accuracy:

0.5 v both scales

Scale Length:

3.500 inches

Indicating Point Type:

Single

Case Type:

Fungus proof-cres hinged lid, carrying case-w/handle

Specification Or Standard:

Ttu-104/e type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-b
