General Description:

Measures impact energy and velocity and calculates material coefficient of restitution, utilizing non-contacting optical sensors; evaluates energy absorbing material employed in design of packaging for weapon system components; eight digit led displal; solid state; 110 v ac; 60 hz; 19.5 in. Lg.; 16.5 in. W.; 3.5 in. H.; overflow, reset, program indicator and cycle mode lights; reset, program selection, cycle and power switches; bench cabinet with pad and tilt stand

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
