Overall Length:

2.378 inches

Overall Height:

1.135 inches

Overall Width:

1.435 inches

Current Type:

Dc

Voltage Rating:

12.0 volts

Special Features:

Component is intended for operation in air; component will be required to withstand a pressure of 1.3 psi without damage or permanent calibration error due to hysteresis component shall be unaffected by any altitude between zero and 3000 feet; the operating temperature range shall be from a negative 40 degrees celcius to a positive 75 degrees celcius; component shall also accommodate an external load of 43000 ohms and output impedance of the device shall be a of 5000 ohms; response time shall be no greater than 15 milliseconds

Fsc Application Data:

Test set, electronic systems, except specially designed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T145-b
