**Overall Length:**

5.312 inches

**Overall Height:**

3.688 inches

**Current Type:**

Dc

**Frequency Rating:**

400.0 hertz

**Overall Thickness:**

4.250 inches

**Voltage Rating:**

Between 0.0 volts and 150.0 volts

**Special Features:**

Range: 0-4000 watts; potential overload continuous; potential burden: 0.1 va; current input : 0-6.25a; accuracy: porm 0.25 pct ro; output load: 0-10 kilohms; freq : power factor range: unity to 0 lead or lag; power factor range: unity to 0 lead or lag; power supply: 85-135 vac; dielectric test vrms

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T145-b
