Product Name:

Radiometer, ultraviolet

Special Features:

3 1/2 digit lcd display; 3 sensitivity ranges; read/hold switch; external zero adjustment; 0 to 2 v recorder output; power 9 v battery; a hand held portable item; includes plastic case

Functional Description:

For use w/ precalibrated, interchangeable sensors; used to provide uv radiation data in test site, data used w/ mechanical pyranograph to determine effects of solar intensity on deterioration of sealing materials w/ time

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T134-c
