Overall Length:

10.020 inches

Overall Diameter:

0.500 inches

Special Features:

Input power 0.24 volt/amp max; stroke is plus or minus 2.150 in.Electrical; plus or minus 2.700 in.Mechanical; linearity is plus or minus 0.250 percent over full scale; operating temperature range is minus 65 to plus 160 degrees continuous to 203 degrees for 30 minutes; nonoperating temperature is minus 80 to 203 degrees; shielding is magnetically shielded internally; terminals are wire leads 32.000 in.Long, twisted one turn/in.And shielded

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T145-b
