**Circuit Current For Which Designed:**

Dc

**Movement Type:**

Moving coil, permanent magnet

**Movement Suspension Method:**

Jewel pivot base

**Special Features:**

Operating temp range m55.0 to p100 degrees c; humidity and vibration resistant; shunt series resistor networks are 1/8 watt metal film type  
330.0 to 875.0 ohm

**Surface Treatment Specification:**

Fed-std-595 federal standard all treatment responses

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A310a0
