Overall Length:

9.750 inches

Overall Width:

5.250 inches

Overall Thickness:

2.500 inches

End Application:

A-10 aircraft

Accessory Components And Quantity:

F: 1.2 hi-efficiency objective lens, f: 3.5 close-up macro objective lens, nvis a filter with calibrations, nvis class b filter with calibrations, wide-field macro viewing magnifier, foam lined case and inspection scope body with specially selected image tube and 4 gain settings

Filtration Feature:

Filtered

Range Selector:

Not provided

Product Name:

Nvis inspection scope for night vision capability

Special Features:

Nvis inspection scope, nist-traceable certification verifies class a and b response and luminance gain; includes 6 volt battery; 110 vac adapter

Reference Data And Literature:

To 5a13-5-17-3agavga-10 aircraft stability augmentation system control panel series 123d6220

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T134-c
