**Overall Height:**

14.0 millimeters

**Overall Diameter:**

58.4 millimeters

**Product Name:**

Pyroelectric joulemeter

**Functional Description:**

Converts laser energy into heat to generate a current in a capacitive load circuit to create a voltage proportional to the laser energy

**Thread Size And Series/type Designator:**

8-32 unc

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A23900
