Overall Height:

14.0 millimeters

Overall Diameter:

58.4 millimeters

Product Name:

Pyroelectric joulemeter

Functional Description:

Converts laser energy into heat to generate a current in a capacitive load circuit to create a voltage proportional to the laser energy

Thread Size And Series/type Designator:

8-32 unc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
