**Overall Height:**

14.0 millimeters

**Overall Diameter:**

58.4 millimeters

**Product Name:**

Detector, pyroelectric joulemeter

**Special Features:**

Altered item from j9lp cage 34285, existing mounting holes are drilled through to a 0.144 diameter and the cover is discarded

**Functional Description:**

Converts laser energy into heat to generate a current in a capacitive load circuit to create a voltage proportional to the laser energy

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
