Overall Height:

14.0 millimeters

Overall Diameter:

58.4 millimeters

Product Name:

Detector, pyroelectric joulemeter

Special Features:

Altered item from j9lp cage 34285, existing mounting holes are drilled through to a 0.144 diameter and the cover is discarded

Functional Description:

Converts laser energy into heat to generate a current in a capacitive load circuit to create a voltage proportional to the laser energy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
