Overall Height:
14.0 millimeters
Overall Diameter:
58.4 millimeters
Product Name:
Detector, pyroelectric joulemeter
Special Features:
Altered item from j9lp cage 34285, existing mounting holes are drilled through to a 0.144 diameter and the cover is discarded
Functional Description:
Converts laser energy into heat to generate a current in a capactive load circuit to create a voltage proportional to the laser energy
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A23900
