Terminal Type:

Connector, receptacle

End Application:

Engine ej-200

Measurement Range:

+5.8/+116.0 pounds per square inch

Special Features:

Dual output jet pipe resonance transducer for sensing dynamic pressure fluctuatins; redundant sensing elements w/ outputs via a four wire intenallyattached hardline cable terminated to esc10ye21212pn connector receptical; performance specification taken at 297 k

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T145-b
