Overall Length:

12.700 inches

Overall Height:

12.700 inches

Overall Width:

10.000 inches

End Application:

Required for army to calibrate the impact model 750

Voltage In Volts And Current Type:

115.0 ac or 230.0 ac

Product Name:

Vt plus hf gas flow analyzer

Special Features:

Includes: bi-directional flow measurements, vacuum and pressure measurements, liquid pressure measurement, operates with or without a test lung, completely stand alone operation, rs-232 and printer ports, high resolution graphical display, 18 secondary calculations, multiple units of measure for all parameters, user accessible O2 concentration sensor, complete adapter kit, , , average, absolute, and graphic for all parameters; software-driven opvs for popular ventilators; stand alone unit with carry case; 50/60 hz frequency; flowing sample type

Functional Description:

Small, lightweight, rugged gas flow that quickly and accurately measures pressure, flow volume, oxygen concentration and barometric pressure; compatible with ventilators utilizing bias flow, peep, cpap, pressure support and volume support technologies

Supplementary Features:

Gas flow analyzer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
