Current Type:

Dc

End Application:

2520-01-553-0488, submersible actuator 3005482

Voltage Rating:

Between 0.0 volts and 10.0 volts

Product Name:

(inavy) linear transducer

Special Features:

Generation 5 linear transducer; 0 to 10 volt dc output; 24 volt dc supply voltage; user selectable rising or falling analog output operation; 178mm active stroke; 10-2mm housing type, with a 15 meter long axle cable out

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T145-b
