**Product Name:**

Force transducer

**Special Features:**

Excitation 26 vrms, 400 hz; input power 0.120 amp ma (each sensor) ; output load 75 k ohms; sensitivy 0.002008 v/v/lbs; temp operating -67 degrees f to +160 degrees f; dielectric strength 750 vms, 60 hz, 1 min. Between winding and case; phase shift +/- 15 degrees maximum w/+/-30 lb

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T145-b
