**Special Features:**

Laminar flow computers are part of the air force's precision measurement equipment laboratory field-level gas flow working standard covering a flow range of approximately 0.001 to 2, 000slpm; the laminar flow computer is coupled with one of eight different sized laminarflow elements; differential pressure transducer range: 15 in. Of water@ 4 c; temperature measurement subsystem uncertainty better than +/- .3 f in the range of 50 to 100 f

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A23800
