Overall Length:

3.630 inches

Overall Height:

6.630 inches

Overall Width:

5.250 inches

Current Type:

Ac

Frequency Rating:

Between 48.0 hertz and 420.0 hertz

End Application:

Navy equipment

Voltage Rating:

Between 0.0 volts and 600.0 volts

Electrical Connection Quantity:

3

Product Name:

(inavy)three phase ac rms voltage transducer

Phase:

Three

Special Features:

Accurate measurement of the true rms value of input voltage over a wide frequency range; i/o dielectric test of 2500v; output rate 0-10vdc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T145-b
