Design Type:

Car

Thermometer:

Not included

Extension Tube:

Not included

Gage:

Not included

Product Name:

Automated liquid sampler

Special Features:

State of the art sample handling and injection system that provides the highest levels of precision and reliability for gas chromatographic sampling; complete redesign of the most popular gas chromatographic sample introduction system in history; consists of injection tower, sample tray, heater/mixer/bar code reader, enhanced sample handling syringe carriage, heater/chiller module, controller board for use with 6890 plus and controller for use with 6890a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T398-c
