Width:

16.0 millimeters

Length:

100.000 feet

Trade Designation:

Mil4

Base Color:

Clear

Film Type:

Motion picture

Film Subtype:

Camera

Emulsion Type:

Black and white

Reproduction Type:

Reversal

Emulsion Sensitivity:

Panchromatic

Exposure Index:

50 american national standards institute daylight and 40 american national standards institute tungsten

Winding Device Type:

Spool

Base Material Thickness:

Between 0.0052 inches and 0.0065 inches

Usage Form:

Roll

Special Features:

Nondefinitive spec/std data: type 3, gamma 2, product 2, relative sensitivity g, spectral sensitivi type 5, support 1, total thickness 4

Material:

Plastic cellulose acetate

Precious Material And Location:

Emulsion silver

Precious Material:

Silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A528h0
