Width:

16.0 millimeters

Thickness:

0.00825 inches

Length:

1000.0 feet

Material Transparency:

Opaque

Winding Device Type:

Core

Perforation Identification Designator:

Ansi ph22.109

Controlling Agency:

Kodak

Identifying Number:

7981 type no.

Stock Type:

Machine

Special Features:

Wound jaw kodak specification lo-458, two 1000 ft rolls unit qty, can

Color:

Black and white

Reference Number Differentiating Characteristics:

As differentiated by length, perforation identification designator, and winding device type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T150-a
