Width:

16.0 millimeters

Length:

100.000 feet

Trade Designation:

Spec vnd430

Base Color:

Clear

Film Type:

Motion picture

Film Subtype:

Television

Emulsion Type:

Color

Reproduction Type:

Reversal

Emulsion Sensitivity:

Artificial light and daylight

Exposure Index:

160 american standard association daylight and 40 american standard association photoflood and 40 american standard association tungsten

Winding Device Type:

Spool

Usage Form:

Roll

Special Features:

.3000 pitch for high speed cameras; edge numbered; metal spool; subdued light load; process vnf-1 for developing

Material:

Plastic cellulose acetate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A528h0
