Overall Length:

3.375 inches

Overall Width:

2.500 inches

Overall Thickness:

1.125 inches

Carrying Case:

Provided

Housing Material:

Plastic, phenol-formaldehyde

Accessory Components And Quantity:

Cord, neck 1

Usage Design:

Motion picture camera or still picture camera

Measurement Unit:

Asa exposure index and candles per square foot and f-stop and light value and seconds

Scale Measurement Range:

+0.000/+1250.000

Graduation Interval:

Irregular

Housing Type:

One-piece

Sensitivity Range:

+0.000/+1250.000 candles per square foot

View Angle In Deg:

120.0 horizontal plane and 60.0 vertical plane

Telescoping Hood:

Not provided

Multiplier Cover:

Not provided

Calculator Type:

Hand-revolving

Special Features:

Luminous dial

Specification Or Standard:

Ph-260 type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T134-c
