Lens Focal Length:

65.0 millimeters

Product Name:

.65x hi-res w/a conv. 37mm

Special Features:

No light loss aperture; full zoom

Supplementary Features:

To get a wide angle of view with complete zoom-through capabilities, shooters can simply add the .65x high resolution wide angle converter to the camera lens front, realizing about 35% wider angle of view across the zoom range, wide angle, telephoto, or anywhere in between; this is a professional high resolution converter for popular ultra-compact camcorders with 37mm front threads

Shelf Life:

N/a
