Special Features:

500 khz fundamental frequency response; low profile, 0.93 inches assembled height; bearing design simplifies encoder attachment; resolutions up to 5000 lines per revolution direct read; 4.6 or 8 pole commutation; conductive carbon fiber housing; standard 2.375 inches bolt circle mounting; through shaft sizes up to 0.625 inches diameter; high noise immunity; 2 inch diameter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T150-g
