Physical Form:

Crystal

Special Features:

Used to precipitate protein; may be used to determine protein concentration by quantitative precipitation; decalcifier and fixer in microscopy; 235 degrees f flash pt; corrosive, causes severe burns on contact; harmful if inhaled/swallowed; may damage lungs; not flammable or explosive, requires ventilation, protective clothing; pungent odor, white crystals, very water soluble; 1.6 specific gravity; 198 degrees c boiling pt

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A10800
