**Physical Form:**

Liquid

**Special Handling Feature:**

Corrosive and poisonous

**Distillation Temp:**

100.0 drift angle initial boiling point

**Product Name:**

Molecular testing cartridge

**Special Features:**

Contains 3 parts beads which are freeze-dried white powders hepes acid and salt, tween 20, magnesium chloride and bovine serum albumin and are contained in a cartridge; the other 3 components are reagents that are clear liquid and contain hazardous ingredients reagent 1 is not considered hazardous under us hazard communication regs 29cfr 1910.1200; reagent 2 is sodium hydroxide (corrosive liquid) and elution quanidine thiocyanate (considered toxic to the environment)

**Color:**

Clear

**Supplementary Features:**

Eu risk phrase for beads is r36/37/38 and eu risk phrases for reagents are r32, r20/21/22, r52/53 and r34; msds sheet effective june 22, 2009 cepheid msds epert mrsa/sa cas no. 7365-45-9 for acids; us osha compoies with reqmts 29cfr 1910.1200; transport class 8, pakcing group ii, dot un1824

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A10800
