Physical Form:

Liquid

Special Handling Feature:

Corrosive and poisonous

Distillation Temp:

100.0 drift angle initial boiling point

Product Name:

Molecular testing cartridge

Special Features:

Required labeling under either or both the us and eu regulations should contain the following; corrosive (contains sodium hydroxide solution) eu risk and safety phrases r34; s2/26/37/39/45; harmful (contains guanidine thiocyanate) harmful to aquatic organisms and aquatic environment; eu risk and safety phrases r 32; 52/53

Color:

Clear

Supplementary Features:

Transport classification of reagent 1 contains 1. On sodium hydroxide is class 8, packing group ii, un1824; proper shipping name sodium hydroxide solution

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A10800
