

View Online at <https://aerobasegroup.com/nsn/6830-01-619-6775>

Physical Form:

Gas

Product Name:

Argon, technical

Special Features:

Density: 1.784 kg/m³; relative density to air: 1.380; boiling point: -185.9 deg. C. At 0.101 mpa 0 deg. C.; reactivity during welding: inert; assembly consist of: 12 cylinders nsn 8120-00-282-8077 filled with argon iaw aws a5.32-i1-ar, cart from weldcoa p/n lcw12-ais or equivalent, manifold from weldcoa p/n lm12b-cpbp-b580; this nsn is for letterkenny army depot use only.

Hazardous Substances:

Argon

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T09100
