Physical Form:

Liquid

Product Type:

Quarternary ammonium

Composition Percentage By Weight:

44.0 n-alkyl dimethyl benzyl ammonium chloride, 56.0 water and octyl phenoxy polyethoxy ethanol

Test Organism Type:

Escherichia coli and salmonella typhosa and staphylococcus aureus

Dilution By Volume For Testing:

1 to 19000, 1 to 19000, 1 to 11000

Test Time Limit:

10.0 minutes

Special Features:

1 packet of solution makes 1 liter of 1 to 1000 dilution, with 1 bottle of rust inhibitor

Reference Number Differentiating Characteristics:

As differentiated by unit pkg qty

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T090-b
