Physical Form:

Liquid

Product Type:

Quarternary ammonium

Composition Percentage By Weight:

B4.375 pct n-alkyl dimethyl benzyl ammonium chlorides; 2.187 pct octyl decyl dimethyl ammonium chloride; 1.094 pct dioctyl dimethyl ammonium chloride; 1.094 pct didecyl dimethyl ammonium chloride

Test Organism Type:

Aspergillus niger and candida albicans and escherichia coli and klebsiella pneumoniae and pseudomonas aeruginosa, atcc 15442 and shigella flexneri and shigella sonne and staphylococcus aureus, atcc 6538 and streptococcus pyogenes and trichophyton mentagrophytes and salmonella choleraesuis, atcc 10708 and citrobacter diversus and citrobacter freundii and enterobacter aerogenes and proteus mirabilis and proteus morganii and providencia sp and salmonella enteritidis and serratia marcescens

Dilution By Volume For Testing:

1.128 diluted 1 oz per gallon

Special Features:

In one gallon bottles; biodegradable; effective in hard water; for use on all washable environmental surfaces

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T090-b
