Special Features:

Miscible with hydrocarbons in all proportions; 0.35 to 3.5 ppm solution has a conductivity of 50 picomho/meters; specific gravi type 0.90 at 60 degrees f; flash point tag closed cup 40 degrees f; pour point less than minus 70 degrees f

General Description:

Umiscible with hydrocarbons in all proportions; 0.35 to 3.5 ppm solution has a conductivity of 50 picomho/meters; specific gravi type 0.90 at 60 degrees f; flash point tag closed cup 40 degrees f; pour point less than minus 70 degrees f

Reference Number Differentiating Characteristics:

1 gallon unit qty, can

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
