Product Name:

Small particle reagent-dark

Functional Description:

Processing latent fingerprints

General Description:

Made of 99.5 percent water, 0.5 percent tergitol and a trace of molybdenum sulfide; boiling point minus 212 degf; melting point minus 32 degf; bottle size 500 ml; 3 bottles per container

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
