**Product Name:**

Omega-print cyanocrylate fuming compound

**Special Features:**

Acrylic resin; molecular weight of 111.1; burning point is 79 degrees celsius; density is 1.1 times that of water; packaging is a container; supplied with drop-dispensing cap that is resealable

**Functional Description:**

Used for fingerprint lifting

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
