Product Name:

Phenolic microballoons

Special Features:

Used for general composite repairs - structural repairs for fa 18 abcd

Color:

Red and purple

Material:

Plastic

General Description:

These red/purple color phenolic spheres when mixed with epoxy resins will create a low density paste compound which will sand easily and improve strength/flexibility of the cured resin. Better for large gap filling.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
