**Product Name:**

Phenolic microballoons

**Special Features:**

Used for general composite repairs - structural repair for fa 18 abcd

**Color:**

Red and purple

**Material:**

Plastic

**General Description:**

These red/purple color phenolic sheres when mixed with epoxy resins will create a low density paste compound which will sand easily and improve strength/flexibility of the cured resin. Better for large gap filling.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
