Alternating Current Voltage Rating In Volts:

115.0

Component Quantity:

17

Case:

Provided

Controlling Agency:

Jetds

Component Controlling Agency:

Usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; usaf; texas instruments inc; lambda; georator corp

Component Name:

Coder-decoder; receiver-transmitter radar; indicator, azimuth-range; indicator, flight command; control, intra-formation positioning set; control, intra-formation positioning set; pedestal antenna; antenna; radome; indicator, attitude; antenna; rack, electronic equipment; alticoder; loudspeaker; trainer control panel; power supply; inverter, rotary

Power Source:

Ac

Identifying Number:

Type no. An/apa-169a

Component Identifying Number:

6ky-567a/apn-169; rt-786a/apn-169; ip-797a/apn-169; ip-1686/apn-169a; cc-6635a/apn-169; c-7956/apn-169a; ab-1034/apn169; as-1798a/apn-169; cw-948/apn-169; aru-2b/a; as-1799/apn-169; mt-4124/apn-169a; aau-21; ls-211/a1 c-13; p/nw 693284-1; p/n lm-ee-28r; p/n 30-020

Alternating Current Usage:

Required

Training Phase:

Organizational maintenance; field maintenance; operation maintenance

Student Position Quantity:

1

Equipment Name:

Radar airborne station keeping system

Training Equipment Coverage:

Limited

Phase:

Three

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T262-j
