Alternating Current Voltage Rating In Volts:

118.0

Direct Current Voltage Rating In Volts:

28.0

Component Quantity:

7

Case:

Provided

Controlling Agency:

Boeing co

Component Controlling Agency:

Boeing co

Component Name:

Panel assembly; console assembly; a-145 panel assembly; a-112 panel assembly; a-101 panel assembly; a-135 panel assembly; instructor panel; forward instrument panel

Power Source:

Ac or dc

Identifying Number:

An/apx-64

Component Identifying Number:

P/n t53j28447-1; p/n t53j28455-1; p/nt53j28455; p/n t53j28455-23; p/n t53j28456-20; p/n t53j28456-21; p/n t53j28456-30

Alternating Current Usage:

Required

Direct Current Usage:

Required

Training Phase:

Demonstration maintenance; familiarization, trouble shooting; demonstration inspection

Student Position Quantity:

0

Equipment Name:

Transponder

Training Equipment Coverage:

Limited

Phase:

Single

Frequency In Hertz:

400.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T262-j
