**End Application:**

Optical multichannel analyzer iii detector system

**Special Features:**

Usage design: gate pulse generator; pulse width: 5, 10, 20 nanoseconds; delay tune: 0 to 256 nanoseconds; amplitude: -200 volts into 50; repetition rate; up to 1 kilohertz; item must interface an external pulse amplifier to the 1460 system processor so that pulse amplifier can be instructed to gate a reticon type detector head at widths of 100 nanoseconds to 10 milliseconds

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A51110
