Component Quantity:

1

Installation Design:

Portable

Controlling Agency:

Lockheed martin company

Component Controlling Agency:

Lockheed martin company

Component Name:

Seeker assembly; precursor/firing module; battery cooling unit; guidance electronics unit; simulated main charge warhead/firing module; electronic safe arm and fire; propulsion unit; control section assembly; modular missile restraint; launch tube assembly

Manufacturer Address:

Orlando, florida

Identifying Number:

Javelin missile cutaway

Component Identifying Number:

Javelin missile cutaway

Training Phase:

Demonstration tool

Equipment Name:

Inert cutaway assembly, javelin missile

Representation Type:

Simulation

Product Name:

Cutaway assembly - javelin

Special Features:

Sides cut out to reveal internal workings of actual missile round; piece/parts and assembly are fabricated from production hardware or alternate materials similar in appearance to production item; highly toxic and carcinogenic materials are not used; chemically inert; no active squibs, propellants, or explosives used; length 47.600 inches (120.9 centimeters); width 11.750 inches (29.85 centimeters)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
