Tow Target Assembly - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6920-00-021-7402

General Description:

Constructed primarily of plastic and all and is capable of being towed to subsonic and supersonic speeds, and at altitudes up to 70, 000 ft. Four radar lenses are installed to provide radar return for target augmentation and tracking. A suitable reflection pattern is provided by one lens in the tow target noise, one lens in tail and two beam lenses near the center of the tow target. 76.790 in. Lg

Shelf Life:

N/a

Unit Of Measure:

__

Demilitarization:

Yes - demil/mli
