Design Type:

Stationary

Training Phase:

Maintenance and operation of the f-16a fire control system

Simulated Aircraft Model Number:

F-16a

Functional Description:

Item is a training device controlled by a computer and is used to train personnel the maintenance and operation of the f-16a fire control system; item has 3 parts, simulation panels, cockpit mockup, and control console; operating power requirements, uses 120/208vac, 50/60hz, 2 phase power; material, trainer will be made of various materials, c/o sheet metal, aluminum, rubber, plastics and electronic components; cockpit dim, 86.500in.L; 67.500in.W; 50in.H; special features; trainer is controlled by an intel 80286 single board computer, c/o f-16 peculiar panels, cockpit and software

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T262-g
