End Application:

Black hawk helicopters

Special Features:

These simulators will be used by u.S. Army blackhawk active and reserve component aircrews to conduct unit, institutional, and new equipment training in order to train uh-60a/l aircrew training manual standard tasks. The simulators will allow uh-60a/l aircrews to retain aircrew operational efficiency and provide a realistic environment for training mission readiness skills. Aats simulators will also be used to support uh-60a/l aircraft qualification, method of instruction, instructor pilot, and maintenance test pilot courses

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
