Accessory Components And Quantity:

Omega 60/b2 launcher, 120v ac power module, input cable assembly 30 foot, 8 foot or special

Product Name:

Battlefield effects simulator (boe) omega 60/b2

Special Features:

The battlefield effects simulator (bes) omega 60/b2 is a training device which ignites pyrotechnic cartridges on command. It can be installed at either stationary range positions in conjunction with a target mechanism, mounted on moving target platforms, mounted in unpopulated environments applications. When used in conjunction with the hostile fire cartridge it produces a flash/bang/smoke signature which simulates large caliber weapon fire. When used in conjunction with the white star cartridge it produces the flash/bang/stars simulating impact of a round on an armor target which produce a variety of battlefield cueing effects. It can be used in both day and night range exercises for thermal/visual/acoustic target recognition in combination with erets, ngats, and uo systems and numerous other training devices or systems.
