Frequency In Hertz:

60.0

Installation Design:

Mobile

Ac Operating Voltage Rating In Volts:

Between 120.0 and 208.0

Power Source:

Ac

Training Phase:

Training for aircrews in threat environment matching battlefield conditions

Representation Type:

Simulation

Phase:

Three

Special Features:

Mobile receiver-transmittercontrol group ok-/tsq-t (mobile command), r/t group oa-tsq-t (threat emitter), with generator set where commercial ac not available

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T356-a
