Product Name:

Tvs m2 sat

Special Features:

The tvs small arms laser transmitter (sat) and laser detectors use laser light in the form of pulses to receive and transmit weapons enagement information. These pulses are transmitted each time a weapon is fired. Information contained in the pulses includes a unique player indentification (pid), weapon and ammunition code. The target entity processes the information to produce real-time casualty assessmen (rtca)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
