Product Name:

Tvs m240 sat

Special Features:

Dvc: 23-106/2

Special Test Features:

Information contained in the pulses include a unique player identification (pid), weapon and ammunition code. The target entity processes the information to produce real-time casualty assessment (rtca)

Supplementary Features:

The tvs small arms laser transmitter (sat) and laser detectors use laser in the form of pulses to receive and transmit weapons engagement information. These pulses are transmitted each time a weapon is fired.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
