**General Description:**

Input signal 0 to porm 10v, input impedance 10 ohms, output signal 0-10v p-p, sine wave w/ 2 percent distortion, output impedance 1 ohm, reference signal 115v at 400cps, reference power 250 mw, phase shift 2 percent, ouput wave shape-sine, linearity porm .5 percent, null offset porm .1 percent of full scale, frequency rponse porm 3 db from dc to 20 percent of reference frequency, power 25-35vdc

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A23900
